II. Mining and Reclamation

1. Was the mine active during the past year? Yes ☒ No ☐
2. If active, how much ore or mineral was mined? 100 tons

3. How much additional acreage was disturbed during the past year? None
4. Briefly describe any new or additional surface disturbances that occurred during the past year. This description should include the type of work performed, and volume of material moved.

Centurion constructed an ore shoot from the entrance of the Plummer Tunnel down to its ore stockpile area. The 100 tons of material mined came from the Plummer Tunnel. The volume of this material mined was approximately 1200 cubic feet.

5. How much acreage was reclaimed during the past year? not applicable
6. Briefly describe the reclamation work performed during the past year. This description should include methods employed, and an evaluation of the results.
- Open-to-the-surface mine workings existed on the property at the time of permitting. All of these open workings have been fenced as requested by State regulators.

7. What is the total disturbed acreage at years end? 2.267 acres

8. Briefly summarize any mining and/or reclamation plans for the upcoming year.

Centurion intends to conduct mine tunnel, mine adit, and existing underground stope stabilization in preparation for underground mining and exploration. Centurion intends to construct a drill pad on an existing road in order to conduct surface drilling.

NOTE: Section III., "Additional Information" applies only to large mining operations.

### III. Additional Information

1. An updated surface facilities map should be attached if there have been significant changes since the previous map was submitted.
